

Built on Tradition. Powered by Innovation.

Combining trusted craftsmanship and a dependable heat source, the FireMax by WoodMaster is a powerful option for those who demand long-lasting performance, high efficiency, and maximum value.

Figure 1: WoodMaster FireMax High-Efficiency Outdoor Unit with Titanium-Enhanced Stainless Steel Firebox

25-YEAR LIMITED WARRANTY

Quality guaranteed by a legacy of dependable outdoor heating engineering.

INNOVATIVE DESIGN & PERFORMANCE FEATURES

Patented HeatLock Baffle®

Secondary heat exchanger provides up to 36% more heating surface area than competitors, trapping heat and gases for complete combustion.

Patented Ripple Top® Design

Significantly increases the radiant heat transfer surface area inside the high-grade firebox.

Combustion Accelerator™

An over-air tube delivers oxygen directly to the top of the Combustion Dome, maximizing extraction efficiency.

Dual Fuel Adaptability

Ready to integrate seamlessly with an optional natural gas or propane burner kit (sold separately).

Rear-Exit Chimney Layout

Eliminates roof leaks and top-down corrosion common in older standard through-the-roof configurations.

High-Density Spray Foam

Provides a continuous, airtight, and waterproof insulation layer around the water jacket.
